

COMPANY OVERVIEW

Full-Spectrum Industrial Maintenance, Repair & Construction

MAC Industrial Services is a full-service industrial maintenance, repair, and construction (MRO/MRC) company serving power generation, refining, chemical, pulp & paper, and infrastructure markets across North America.

Founded on the principles of craft excellence and uncompromising safety, MAC Industrial deploys self-performing crews with the specialized skills, tools, and code certifications required to execute complex scopes on schedule and within budget — whether planned or emergency.

- Industrial Maintenance — Planned and predictive maintenance programs maximizing asset uptime
  - Outage Services — Expert planned and forced outage management with national mobilization capability
  - Welding & Fabrication — Code-compliant P91/P22 welding, PWHT, and custom fab
  - Emergency Response — 24/7 rapid response with 4-hour target deployment
  - Capital Projects — Full-lifecycle delivery from engineering coordination through commissioning
  - Resource Solutions — 40,000+ vetted craft professionals for supplemental workforce needs
- 
- Self-performing workforce — no subcontracted craft labor on critical scopes
  - Held ASME S, R, and U stamps with active NBIC membership
  - AWS-certified CWI and CAWI inspector roster
  - NCCER-credentialed craft professionals across all disciplines
  - Integrated safety management system with sub-0.5 TRIR performance
  - 24/7 emergency response line with pre-positioned specialty tooling
  - National geographic reach with regional management infrastructure

Industry	Representative Work Scope
Power Generation (Coal/Gas/Nuclear)	Boiler tube repair, HEP inspection, APH refurbishment, outage management

Industry	Representative Work Scope
Pulp & Paper	Kraft recovery boiler maintenance, digester/evaporator work, paper machine service
Refining & Chemical	Pressure vessel repair, catalyst handling, heat exchanger bundles, piping
Infrastructure	Firewater systems, HDPE piping, structural steel, mechanical installation
Cement & Mining	Rotating equipment repair, structural maintenance, kiln shell work
